- Also following latest updates in the field of cyber security

EDUCATION

TOBB Economy and Technology University, Ankara, Turkey

Bachelor of Science: Computer Engineering

GPA: 2.91/4.00

September 2021 – Present

EXPERIENCES

HAVELSAN, Ankara, Turkey

May 2025 - August 2025

- During my internship, I worked as a backend developer on the open-source software product Liman at Havelsan. During the backend development period, I worked extensively on Go and Linux. I also gained experience in the field of DevOps by using Docker and Kubernetes during the deployment of the products and extensions I developed. Also gained experience with PostgreSQL, Redis, OpenTelemetry, ClickHouse, Prometheus, etc.

AYESAŞ, Ankara, Turkey

September 2024 – December 2024

- During my internship, I have worked in radar project, developed message classes and message scenarios using Java, Python and Jython. Used Rational DOORS for documenting and developed a message simulator using UDP channels for communication and UI with JavaFX

TOBB Economy and Technology University, Ankara, Turkey

May 2024 – August 2024

- Undergraduate Teaching Assistant of the Introduction to Java (BİL113)

STM, Ankara, Turkey

January 2024 – April 2024

- During my internship, I made backend developments on a web service with the Django framework. In this way, I developed myself in the field of Python, Linux. I also had the opportunity to develop myself in the field of Cyber Threat Intelligence. In addition, during the internship, I gained teamwork experience using software development methodologies such as agile, scrum meetings, sprints, JIRA, etc.
